THE CRITICAL INCIDENT MANAGEMENT PLAN (CIMP)

The aim of the CIMP is to help school management and staff to respond quickly and effectively in the event of a CI, to maintain a sense of control and to ensure that appropriate support is offered to students and staff. Having a good plan should also help ensure that the psychological effects on the students and staff will be limited. The CIMP should enable the school to return to normality as soon as possible.

DEFINITION OF A CI

‘An incident or sequence of events which overwhelms the normal coping mechanism of the school and disrupts the running of the school.’

CIs may involve one or more students or staff members, or members of the school/ centre or local community. The following are examples of critical incidents, but are not limited to these:

- a) The death of a member of the school community through accident, violence, suicide or suspected suicide or other unexpected death
- b) An intrusion into the school
- c) An accident involving members of the school community
- d) An accident/tragedy in the wider community.
- e) A physical attack on a staff member, student or school community
- f) Serious damage to the school building through fire, flood, vandalism, etc...
- g) The disappearance of a member of the school community

- l) An accident / incident on near-by access roads.

THE CRITICAL INCIDENT MANAGEMENT TEAM (CIMT)

The CIMT is comprised of members of the SST and additional members of staff may be included as required in the event of a CI. It should also be noted that it is the duty of all staff to promote and safeguard the welfare of learners and staff following the occurrence of a CI.

In order to ensure the school is in a position to respond effectively to any crisis that it may encounter, the SST Coordinator will review the CIMP at the beginning of each year, reviewing roles and responsibilities, including training on CI procedures. All staff should have digital access to the CI policy. The CI team will have access to the CI shared drive which contains the school’s policy, plan, and materials particular to their role, to be used in the event of an incident.

Following an incident deemed to be of a critical nature, the SST/CIMT will be contacted by the Principal to meet at a designated location. The notification will inform them of the type of incident and the exact location of the incident. When the SST/CIMT arrive at the scene they need to:

- Manage the incident scene where appropriate
- Remove people at risk
- Call the emergency services and alert first aiders etc...
- Follow the instruction of competent personnel – Gardaí, Fire Personnel, etc...
- Cooperate with the external services if they assume control of the incident
- Liaise with the media.

If an incident happens during the night or at the weekends or during holiday periods, the SST/CIMT needs to respond to it in an appropriate manner. A judgement needs to be made of how best to deal with the event at the school and in the wider community. The Team Members may be contacted on mobile phone, etc... The SST/CIMT may need to initiate actions to allow the school carry on its work. A decision will be made by management in conjunction with the SST/CIMT as to which protocols / procedures to implement depending on the CI.

 - to safeguard the welfare of another student or individual
-
- a) A staff member should always respect the nature of a relationship occasioned by the sharing with him/her by a student of personal information
 - b) Consent of the student and/or of the parent/guardian to disclose personal information should usually be sought where possible
 - c) Personal details about the lives of students that either they themselves or their families have confided in a staff member will not be discussed among staff or shared with others unless to promote the safety of the person concerned. In this instance, this will occur after the student has been informed of the reasons for doing so. However, it is essential that this information is only shared on a need-to-know basis. The test is whether or not the person to whom the information is being passed on has any legitimate involvement or role in dealing with the issue. This does not include conferring with or reporting to a superior or passing to a colleague, on a need-to-know basis, information relating to the personal circumstance of a student, in the interest of that student.
 - d) Access to personal information will be available to designated school personnel only.

- e) Staff, therefore, should be clearly informed about the policy and procedures regarding when they can share information and with whom they can discuss their concerns i.e., the reporting procedures for their school.
- f) Staff should make it clear to the students that they cannot promise to keep information confidential. Students need to know that any information they share with staff regarding anything illegal will be passed on in a sensitive way to the appropriate person(s). If a staff member suspects that a student under the age of 18 is at risk, this information will be passed on to the designated liaison person. If the student is over 18 years and discloses abuse identifying an alleged abuser, this must be reported as it becomes a child protection issue. If they do not reveal a name then the member of staff who receives the disclosure should encourage them to identify this person, especially if the alleged abuser has access to children.
- g) The legal principle that the welfare of the child/student/ is paramount means that considerations of confidentiality should not be allowed to override the rights of the students to be protected from harm. In other words, protection of the student is more important than confidentiality. Information should therefore be shared on any concerns about a child's or an adult's behaviour.
- h) It should be clearly understood that information which is gathered for one purpose, must not be used for another without consulting the person who provided the information.
